DIESEL

Your Source for Precision Remanufactured Diesel Components

717-932-7000 • flightdiesel.net

Allison® Transmissions is no longer providing service parts on the below listed models, therefore as the approved supplier for over 10 years to the Allison® network we are now able to offer this unit to our current Flight Diesel customer base: These include Electronics Control Modules (ECM) with software from 1987 and newer.

- All MT600 Series
- All 5000, 6000, 7000, 8000 and 9000 Series
- All HT/CLT700
- All V700 Series

These transmissions can be found in large bore gasoline and mid-range diesel engines in short haul tractors, pickup and delivery trucks, fire trucks or emergency vehicles, buses and motor homes, trailer spotters and agricultural applications, on/off highway service such as: dump trucks, refuse trucks (garbage packers), transit mixers or block trucks.

All units undergo the following processes

- Tri-temperature testing
- Tested with an automated OE tester using OE specifications
- Complete APQP process
- TS16949 and ISO 9001 certified remanufacturing facility

Majority of part numbers will fall under two families:

Off Highway	On Highway
Flight Diesel PN 16172029	Flight Diesel PN 16241550
Allison® PN 1228282	Allison® PN 1228283

See our current, compiled part number list for these two family numbers at flightdiesel.net

Warranty: One (1) year unlimited mileage.

Lead-time: 3-5 business days from receipt of unit.

Diagnostic & Repair Audit Fee: \$350 will be charged if the unit received cannot be repaired and no core is available to replace the unreparable unit or if core is available and the customer selects not to purchase a replacement unit.
