Every diesel component Flight Diesel remanufactures is completely tested to assure optimum quality

- Experienced turbocharger technicians disassemble each turbo and route the components through a several step cleaning and inspection process
- All critical to function components are re-certified or replaced with new components
- Individual rotating wheel assemblies are low speed balanced first, as part of our 2 stage balancing
- All complete cartridge assemblies are final tested on a high-speed balancer in speeds in excess of 60,000 rpm
