6.0L • 4.5L • VT365 • VT275 Performance Fuel Injector

Flight Diesel is currently offering remanufactured G2.8 injector for use in high-performance tuned or modified Ford®/International® 6.0L Diesel engines. These injectors have a new nozzle rated for 100% over stock fuel flow. This allows the fuel chamber to empty more quickly during an injection event.

- Injectors are kept in matched sets through the disassembly process for optimum performance
- After cleaning, all injector clearances are measured with precision air gauges to confirm and prevent any fuel leakage passing the critical high-pressure components.
- All air gauge data measurements are retained and stored by serial numbers and date. This step gives peace of mind that catastrophic engine dilution problems cannot occur.
- After final assembly, all injectors are 100% tested and data is recorded for critical engine application checkpoints, to assure a quality product.

Description	Model Year	OE PN (Ref Only)	Ford PN (Ref Only)	Flight Diesel PN
VT 365 / 6.0 L International®	2002.5 - 2003	1843089C91 1845879C91 1843481C94	3C3Z-9E527-AE (Replaced # 3C3Z-9E527-ABRM)	P5560B
6.0L DIT Ford® Power Stroke®	2003 - 2004	1843481C95		
6.0L DIT Ford® Power Stroke®	2004 - 2006			
4.5L DIT Ford® Power Stroke®	2006	1843089C91 1845879C91 1843481C94	3C3Z-9E527-AE (Replaced # 3C3Z-9E527-ABRM)
